Clinical Compliance™

Clinical Oversight and Management

Our analyses provide clarity and help to prioritize high risk problems, providing hundreds of clinical edits and medication compliance/adherence results

Clinical Compliance Utilizes:

Comprehensive Medication Review

An automated review of medication that is linked to:

- Billing
- EMR
- Patient Letters
- Prescriber Letters

Patient Specific Queries™

Identifying gaps in care and managing improvements by directing change and monitoring that change to achieve better clinical effectiveness and a lower risk

Treatment Calendar™

Identifying the most complicated patients by aggregating the various edits from our Patient Specific Queries for improved quality of care with a clinical approach

CMR
Comprehensive Medication Review

MTM
Medication Therapy Management

Each month Pro Pharma evaluates diagnostic and medication profiles for every patient in the plan. Patients can be evaluated using client selections such as:

- Patient
- Diagnosis
- Age
- Gender
- Patient Severity
- Clinical Edit Problems
- Prescriber

Medicare patients can be reviewed for CMS selected criteria in MTM.

Patient problems can be prioritized and selected for review with accompanying reports and recommendations for each clinical edit problem.

Digital letters can be autogenerated for prescribers and patients with concerns and recommendations for change.

Important client benefits are:
- *Improved MTM Completion Rates*
- *Improved HEDIS Scores*
- *Best-in-Class Ratings for Prescribers*

PRODATA
ANALYTICS

Patient
Specific Queries™

Pro Pharma analyses all pharmacy and medical data monthly for compelling clinical edits. These reports identify categories of edits as effectiveness problems, elevated risk concerns, and opportunities for improving utilization or cost savings. There are over one-hundred reports, but some of the most compelling show: compliance problems, duplicate therapy, medications discouraged for age or gender, dosing concerns, polypharmacy, coordination of care, and drug-induced disease. Each clinical report is prioritized on a 10 point scale so problems can be prioritized for management purposes.

Reports can be viewed in total by prescriber and/or patient. They can also be evaluated by category. The results of reports identified for all prescribers and patients are trended over time to identify performance improvements.

PSQs are also included in the Quality Management Program™ that identifies and drives quality improvements down to the patient level for appropriate management.

PSQs Provide Answers to:

- *What are the high priority risks to my population?*

- *Who is responsible for managing these risks?*

- *How have the risk changed over time?*

PRODATA
ANALYTICS

Treatment Calendar™

Pro Pharma Treatment Calendar™ is a proprietary program comprised of Artificial Intelligence rule sets, which allow for quality, utilization and cost comparisons by peer-to peer, peer-to-best in class, peer to national norms, peer to local norms.

Pro Pharma uses clinical protocol to analyze patient encounter data and diagnoses for required exams, tests, and medications.

Every month the staff can use Treatment Calendar™ to schedule patients for the appropriate services for those individual patients.

Treatment Calendar™ is a:

- *Quality tool for benchmarking*

- *Tool to align provider and payer incentives by focusing on actionable patient specific quality improvements*

- *Risk management tool to identify therapy that doesn't comply with national norms*

- *Tool to graphically identify gaps in compliance.*

Product Features:

- *Analysis of complicated and integrated data sets*

- *Inexpensive compared to the high cost of other Disease Management*

- *Inexpensive with respect to medical and pharmacy benefit costs*

Analytics at Your Fingertips

With the right tools - Anyone can be an Analyst

Having data at your fingertips is a management imperative. Having analytics that are easy to use and interpret is a crucial management tool.

While big data employs specialized mathematical tools, the technology marketplace has moved much of the simple analyses to reporting that can be used on the desktop or mobile environments.

Pro Pharma and ProData Analytics have developed tools that will bring analytics to the manager who is not an analyst. Many of these tools rapidly, efficiently, and graphically utilize integrated claims data. An extensive list of filters makes it easy to customize your analyses.

The objective to analytics:

- *Identify cost and quality drivers*
- *Make predictions*
- *Develop action plans*
- *Trend results*
