Fraud, Waste & Abuse

Identify FWA at Pharmacy, Provider, & Patient Levels for Interventions and Correction

FWA is a problem based on the IDENTIFICATION of high probability offenders (fraud) and a program to PREVENT high probability abuse and waste.

FWA can occur when prescribers, patients, or pharmacists err for any one of multiple reasons – e.g., intentional fraud, careless waste, or abusive behaviors – management must attack the problem using multiple strategies.

These strategies target prevention while the most egregious offenders are targeted for fraud.

What are the high probability intervention opportunities?

What interventions are possible at point-of-sale?

What are the opportunities for preventing further abuse or waste?

Important client benefits are:

- *Make FWA a resource-efficient and cost-efficient process*
- *Target prevention to limit the time and resources spent on prosecuting fraud*
- *Target high value fraudulent opportunities*

PRODATA
ANALYTICS

Analytics at Your Fingertips

With the right tools - Anyone can be an Analyst

Having data at your fingertips is a management imperative. Having analytics that are easy to use and interpret is a crucial management tool.

While big data employs specialized mathematical tools, the technology marketplace has moved much of the simple analyses to reporting that can be used on the desktop or mobile environments.

Pro Pharma and ProData Analytics have developed tools that will bring analytics to the manager who is not an analyst. Many of these tools rapidly, efficiently, and graphically utilize integrated claims data. An extensive list of filters makes it easy to customize your analyses.

The objective to analytics:

- *Identify cost and quality drivers*
- *Make predictions*
- *Develop action plans*
- *Trend results*

About Pro Pharma & ProData Analytics

Pro Pharma Pharmaceutical Consultants, Inc. is a multi-service, woman owned, privately held consulting firm offering a vast portfolio of services to public and private entities including self-insured employers, unions, public employers, for-profit hospitals and integrated health networks, health care insurance companies, worker's compensation insurers, small-to-medium sized HMO's, and physician groups.

Established in 1986, Pro Pharma's consulting services are grounded in the use of data and the communication of that information to define benefit trends, drivers and other analytical indicators.

Pro Pharma has developed IT capabilities over the last 30 years that focus on Standardization and Analysis of Integrated Data Sets (i.e., Medical Encounter, Member, Provider, Pharmacy Claim detail, etc.), for audit work, oversight and management of PBMs and for control of specialty medical costs and programs.

Pro Data Analytics was formed to focus on data analytics in all industries. ProData has significant expertise in Programming, Systems Analysis, and Data Analysis.

Pro Data Analytics has been supporting Clients who need:

- Assistance building their own analytics internally
- A bridge analytics to outsource while developing inhouse
- Back Office Support (hosting) for those clients who require more comprehensive "just in time" support
- Specific one-time analyses that can be addressed quickly
